

# DDS Remote Work Policy (Synthetic) v1

Effective date: March 03, 2026 | Dubai (GST) | Internal - Synthetic Demo

Note: This document is a synthetic, training-friendly remote work policy for demos, onboarding simulations, and HR-policy chatbot prototypes. It is not legal advice and must be reviewed by qualified counsel before any real-world use.

## 1. Remote Work Philosophy

DDS supports remote and hybrid work because our team and learners are global. Remote work is a privilege tied to trust, outcomes, and security. Remote success requires:

- Clear goals and ownership.
- High-quality written communication.
- Reliable availability during core collaboration hours.

## 2. Eligibility & Approval

Remote work depends on role suitability, performance, and operational needs.

- Approval is granted by the line manager.
- HR may define role-based constraints (e.g., event roles require onsite presence).
- DDS may revoke remote status if outcomes or security requirements are not met.

## 3. Working Hours & Availability

- Teams define core hours where everyone is expected to be reachable.
- Outside core hours, work is flexible as long as deliverables are met.
- Keep calendars accurate; update status (busy/OOO) and response expectations.

## 4. Home Office Setup (Minimum Standard)

- Stable internet connection and a quiet workspace.
- Headset for calls; webcam as required for meetings.
- Ability to protect confidential information (no shoulder-surfing, lock screen).
- Use approved storage and collaboration tools.

## 5. Security & Data Handling

- Use company-approved devices when provided.
- Enable strong authentication (MFA) on all work accounts.
- Keep devices updated with security patches.
- Do not store DDS data on personal cloud drives or unapproved services.
- Report lost devices or suspected compromise immediately.

AI tools:

- Do not paste confidential documents into public AI tools.

- Use approved enterprise environments for sensitive data when available.

## **6. Meetings, Documentation & Asynchronous Work**

DDS prefers async-first documentation:

- Write decisions and action items in shared docs.
- Record key meetings when appropriate (with consent).
- Use clear templates for project updates (status, risks, next steps).
- Reduce unnecessary meetings; default to written updates when possible.

## **7. Travel, Working From Abroad (Example Rules)**

- Working from outside your usual country may require manager approval.
- Consider visa, tax, and data access restrictions.
- Maintain secure connectivity; use VPN if required.
- Time zone shifts must not disrupt critical commitments.

## **8. Equipment & Expenses (Example Policy)**

- If DDS provides equipment, it must be used for work and returned upon exit.
- Expense reimbursement (internet/tools) depends on your contract and role.
- All expenses require receipts and prior approval where applicable.
